Experience

Senior Software Engineer Surge 2016-present

Client: *Medical Billing Company*

- Full stack developer on a 2 person team that created and maintained a greenfield HIPAA-compliant React/Node/Express/MySQL app that runs a 200+ employee medical billing company.
- Set up production and testing AWS environments and pipelines.
- Handled sprint deployments.
- Wrote parsers for healthcare industry formats HL7 and X12.
- Integrated with 3rd party APIs including Twilio and Availity
- Created mobile apps in React Native

Client: *DSN Global 100 company*

- Developed business apps in Angular 2, TypeScript, and React

Full Stack Developer Tortus 2019-2020

- Lead developer for a real estate startup
- Architect and primary developer of React/Node/Express/Postgres apps with integrations for TransUnion, Stripe, USPS, Google Maps, Twilio, and an eSignature platform
- Set up multiple AWS environments and handled deployments

Lead Hacker-in-Residence Hack Reactor 2015

- Taught classes on Javascript, front-end, and functional programming fundamentals.
- Conducted admissions interviews. Assessed over 70 candidates on Javascript proficiency.
- Weekly check-ins with all residents to identify developing issues. Organized community-building events.

Education
